

# LONG-SPAN SHELVING

Perfect for hand loaded products and small goods racking

Our fully adjustable long-span shelving system is designed for storage of light to medium loads and comes in two finish options.

The construction is similar to pallet racks - it comprises frames, beams and either powder coated steel inserts or timber shelves. The upright is perforated at a pitch of 50mm allowing boltless mounting of the beams.

The tapered shape of the hook guarantees a stable and rigid design, even without back bracing.

## POWDER COATED STEEL INSERTS

These prices are based on 2m high units with 4 shelves and includes GST. 2.4m high units also available.

Beam Length	400mm(D)	600mm(D)	900mm(D)
1200mm	\$353	\$381	\$434
1800mm	\$442	\$477	\$545
2400mm	\$559	\$601	\$685

## WOODEN SHELVES

These prices are based on 2m high units with 4 shelves and includes GST. 2.4m high units also available.

Beam Length	400mm(D)	600mm(D)	900mm(D)
1200mm	\$293	\$333	\$394
1800mm	\$371	\$410	\$469
2400mm	\$439	\$506	\$605

Beam Length	1200mm	1800mm	2400mm
Rating per pair	793kg	529kg	372kg

Support beams for 900 deep timber shelves now available!

## OTHER PRODUCTS

### WORK BENCHES

Our work benches are the perfect addition to any workshop, garage or shed. Either made from our long-span shelving units or pallet racking for more heavy-duty work. Available in different heights, depths and lengths, these can be custom made according to your needs.

#### FEATURES

Optional tubes fit into top of arms for product separation.

### MINI CANTILEVER

Our Mini Cantilever system is designed for hand or machine loading storage of medium loads to maximize your storage space while giving you easy access to your products

#### TECHNICAL SPECS

- The tower and base are bolted together
- Single and Double sided system
- Suitable for forklift or hand loading
- Arms are bolted to Tower and adjustable every 75mm, dependent on goods being stored
- The modular nature of our systems means additional arms, uprights and bases may be added easily as your storage needs change
- 2.25m High | Arms 600mm | Rated to 500kg per arm

## PALLET RACKING

### SINGLE SELECTIVE

- Boltless connection allows for quick assembly
- Versatile storage capacity

### DRIVE IN/ DRIVE THROUGH

- Safe block stacking for fragile goods
- Three types of drive in tracks

### CARTON LIVE/MOBILE

- Ideal for order picking
- FIFO stock rotation guaranteed
- Built-in roller tracks

### ATLAS PALLET SHUTTLE

- Self-powered shuttle
- Loads and unloads automatically
- Deep lane storage and retrieval system
