

Long Span Shelving System

Medium-Duty, Adjustable Storage for Light Medium Loads

Our Long Span Shelving System is engineered for the efficient storage of hand-loaded products and small goods. Designed for industrial, commercial, and residential applications, this system delivers a versatile, durable, and cost-effective storage solution.

Each unit is supplied with four shelf levels and is available with either powder-coated steel inserts or timber decking, offering flexibility to suit a range of storage requirements.

Long Span

Fully Adjustable Configuration

Shelves can be positioned at 50mm increments, allowing precise height adjustment to suit varying load sizes.

✔ **Additional Shelving extension available**

Boltless Assembly System

- Quick and simple installation
- No nuts, bolts, or special tools required
- Beams lock securely into uprights using a Tapered hook design & Safety Clip

Pre-Assembled Frames

Frames are delivered fully assembled for fast on-site setup simply install beams at your desired levels.

Stable, Rigid Structure

The tapered beam hook connection ensures excellent structural strength without the need for back bracing in most applications.

Flexible Installation Options

Install it yourself or utilise our professional installation service.

Construction & Design

The system is based on a pallet racking-style structure, comprising:

▶ Upright frames (pre-assembled)

▶ Shelf inserts (steel or timber)

▶ Load beams

The upright columns are perforated at a 50mm pitch, enabling tool-free beam adjustment and complete layout flexibility.
